

Airline Organisation Readiness Review

When wishing to direct an airline's organisation toward new objectives, the management needs to assess its existing capabilities and its ability to tackle the new challenges.

Our service allows an independent and impartial assessment which enables management to ascertain the readiness of its organisation to meet the objectives.

RAS has the expertise to assist you in reviewing your airline's in accordance with EU/FAA or other international airworthiness requirements.

The following presents highlight of these activities which can be performed individually or packaged according to your needs.

We can offer an optional service of a pre-IOSA review.

Technical

Technical Capabilities

Performs a review of personnel, procedures and readiness in the following areas: Aircraft Engineering and Maintenance - Ground Handling - Cargo Operation.

"(Reliance Aerospace Solutions) assisted Air Mauritius in negotiating a Maintenance Contract (with an MRO) which saved the company 600,000 dollars."

Nirvan Veerasamy, former CEO of Air Mauritius as reported in l'Express Mauritius 4th February 2009

We hired the services of Reliance Aerospace Solutions to perform 2 projects. The first project consisted of reviewing the organisational structure of the Technical Division and the second consisted on the optimisation of the structure. The projects were accomplished in a professional and timely manner and indicated a good knowledge and understanding of the operation of a technical division in an airline. The reports and presentations were well prepared and easy to understand. At the end it gave us a profound idea on how to continue with the Technical Division at TUifly.

Thanks a lot for all the good discussions we had.

Claus-Peter Suelflow
Director Technical Services
TUifly

First of all, on behalf of ECA, I would like to thank you for the study, your company carried out on our behalf, for the options for the future planning of our fleet. I used the study extensively on my recommendations for the future planning of the fleet.

John Savvides
Chief Operations Officer
(Accountable Manager under EU-OPS)
Eurocypria Airlines Ltd.
